

Survey Report

Survey Information

Site Name:	High Crest
Date:	May 5, 2020
Biologist:	Jeff Horn
Survey Method:	airboat

Water Quality

Alkalinity (mg/l) [Range: 20-200 ml]	Dissolved Oxygen (ppm) [Desirable Range: 6-10 ppm]	Secchi/Clarity (ft) [Higher=Better]	pH (SU) [Range: 6.5-8.5 SU]	Temp. (°F) [Seasonal Range: 41-86°]
80	12	12	7.25	54

Note: Typical ranges are provided unless otherwise noted. Normal readings may be within, above or below typical ranges. Fluctuations from normal readings may indicate a need for further analysis.

Comments

The plants in the lake remain the same as of April 20th. A few of the parameters have changed, clarity is up from 10ft to 12ft. pH is down to 7.25 from 8 and the temperature is up 4 degrees. Lake looks good. See you in two weeks.
