

Survey Report

Survey Information

Site Name: High Crest
Date: May 18, 2020
Biologist: Jeff Horn
Survey Method: airboat

Water Quality

Alkalinity (mg/l) [Range: 20-200 ml]	Dissolved Oxygen (ppm) [Desirable Range: 6-10 ppm]	Secchi/Clarity (ft) [Higher=Better]	pH (SU) [Range: 6.5-8.5 SU]	Temp. (°F) [Seasonal Range: 41-86°]
68	12	10	7.5	64

Note: Typical ranges are provided unless otherwise noted. Normal readings may be within, above or below typical ranges. Fluctuations from normal readings may indicate a need for further analysis.

Comments

The northern end of the lake and a few areas along the eastern shoreline support both Leafy-pondweed and Curly-leaf pondweed becoming colonized with filamentous algae. The rest of the lake remains free of nuisance plants. The lake looks good and continues to support high water clarity and good chemistry. The plants and algae were treated.
