Description of Work

Waterbody	High Crest Lake				
Secchi (feet)	6	Dissolved Oxygen (ppm)	11	Posted Water Use Rescriptions	
Temp(F)	49	PH	6	Hardness	90
				<input type="checkbox"/> Yes <input type="checkbox"/> No	
Type of Service	<input checked="" type="checkbox"/> Survey <input type="checkbox"/> Treatment <input type="checkbox"/> Fountain Service <input type="checkbox"/> WQ Sample Service <input type="checkbox"/> Other Service				

Species Treated

Comments

Surveyed the waterbody observed no significant growth of aquatic vegetation at this time. Observed a minor growth of filamentous algae along the bottom benthic zone. This green algae is very beneficial for the fisheries during the spring periods. Observed early growth and sprigs of Curly Leaf Pondweed and Eurasian Water Milfoil floating along the shoreline and within the sediment along spot specific areas of the lake.
 LMS return further management.
 Overall condition: Good
 Spoke and met with Lynn and Melissa concerning the condition of the lake at this time and the seasonal management.

Aquatic Algae Present

Filamentous

Aquatic Plants Present

Curly Leaf Pondweed
 Eurasian Milfoil
 Spadderdock
 Water Lily
